

Bellona

If you could taste art.

Straight, modern und powerful: with the Bellezza Bellona and its dual boiler we come very close to the perfection that we as baristas long for.

An espresso machine as a work of art. Every barista knows: it is a challenge to prepare a delicious espresso. A craft that has been perfected over the years. We have also made the Bellona perfect with its large steam lever and unique design.

The Bellona is a dual boiler beauty with an external round design water tank.

PID control, shot timer and stainless steel on all corners and edges of the extravagant construction in black, white, or metal ensure a perfect taste and visual enjoyment.

With an absolutely constant temperature for the Bellezza E61 brew group and almost infinite steam output, you lose yourself in all imaginable flavors and undertake an espresso discovery journey. Straight curves brew better.

Espresso as a total work of art .

	Bellona
Machine Type	Dual boiler
