

Inizio R & Inizio R Leva

Every story has a beginning.

The Bellezza Inizio. Our first in-house development and our pride. A classy espresso machine for coffee enthusiasts, made with inimitable precision.

This is espresso interpreted by German engineers. When we dared to develop our first espresso machine, we were aware of one thing: it must exceed the highest standards.

A modern classic for small cafés, the design office and at home.

The polished stainless steel construction houses the stainless steel boiler for this valuable two-circuit system. Hand-ground and polished edges complete the perfectly manufactured, tested, and certified material. The Inizio E61 brewing unit is a proven, long-lasting café standard and has been the perfect choice for

every barista for decades. Along with PID control, two big manometers for pump and boiler pressure and a shot timer result in an excellent espresso machine that fears no comparison. The Inizio R with rotary pump is available in two models. On the one hand with a rotary valve, on the other hand as Leva with a tilt valve. According to your taste. Perfect execution for your ideal barista craft.

Espresso, interpretiert von deutschen Ingenieuren.

Inizio V

Inizio V Leva

	Inizio V	Inizio V Leva
Machine Type	Dual circuit	Dual circuit
