

## Bellezza Piccola 60 Titanio V2

# Grinding like a barista.

The Piccola 60 Titanio V2 is our first in-house developed, professional coffee grinder for the top home barista setup with finely adjustable grind levels.

The grinder stands out from the crowd with thoughtful details. You could theoretically process up to 60 tons of espresso beans through its 60mm titanium grinding discs - if you had the time. But longevity is by no means everything.

Perfect espresso.  
From every whole bean.

For a relaxed life as a home barista, you need top results. This is ensured by the infinitely variable adjustment of the grinding degree and the grinding speed from 1.3 to 2.2 g/s. Two fixed programmable times give the user all the options, e.g. also in the fast operation of a small café.

The Piccola is made of polished aluminum with a vintage look and comes with a practical portafilter fork for easy hands-off operation. This turns espresso beans into the finest powder and filter roasts exude even finer notes during infusion.
